

Street LED Module 35W 3-Row Mini 750mm

Type of LED Module	Outdoor / Street
--------------------	------------------

LED Module Profile	Three row
--------------------	-----------

LED Module Length	750 mm
-------------------	--------

LED Power	35 W
-----------	------

Voltage	100-240V
---------	----------

Average LED Module lifetime	120 000 h
-----------------------------	-----------

Working temperature	-40°C to +40°C
---------------------	----------------

CRI	> 70
-----	------

White LED unit lm/W efficiency	160-170 lm/W
-----------------------------------	--------------

Driver	Add-on
--------	--------

Material	Aluminium, stainless steel, polylactide, polyurethane and similar materials depending on which type of LED Module you choose
----------	--

LED Color Temperature	Cool White, Warm White, Candle White, Natural White
-----------------------	---

LED Module Housing Color	Anodized: Natural, Black, Golden Light, Golden Dark, Champagne, Olive, Brown, Extruded Aluminium without color coating
--------------------------	--

Plastic End Caps	Without End Caps, Black, Gray, Red, White
------------------	---

LED Module Diffuser	Choice: Yes/No
---------------------	----------------

Street LED lighting is designed as street lighting, outdoor home lighting, outdoor office lighting, outdoor industrial areas, outdoor public areas. The LED lighting, with a built-in power supply (100-240V), is a unique patented design that features an unrivalled intensity of light (lux), resistance to heat, cold and water (IP67 rating), minimal power consumption and a competitive price.
